

Our expertise in key fabrication activities such as welding, coatings, casting, forming and heat treatment ensures suitable controls are included. This knowledge also extends to nondestructive testing techniques.

We have extensive experience in quality assurance for equipment fabrication and in the audit of suppliers. We have dealt with a diversity of manufacturers, not only in Canada, but also throughout North America and Europe

Repair plate on acid storage tank

Poly-urea coating inspection

Leak testing of heat exchanger

## What we can do for you...

### Welding – Coatings – Casting Heat Treating – Forming

- Dye penetrant examination
- Magnetic particle examination
- Ultrasonic testing
- Eddy-Current
- Hardness testing
- PMI (positive materials identification) with portable XRF alloy analyzer
- In-situ metallography

PMI of weld overlay with portable XRF analyzer
